**Database definition:** A structured, electronic collection that may contain full-text articles, abstracts, data, and citations – typically requires subscription access

*Note: This is for a database article published directly online by the database with no in print original

**Structure:** Last, F. M. (Year, Month Date published). *Article title*. Retrieved Month Date, Year, from URL

*Note: Add homepage URL of publisher. If none, use the homepage database URL. If published only online, use unique URL

**Database name:** Contemporary Authors

**Article name**

**Author:** If no author is found, title goes before published date.

**Date electronically updated**

Use the date when the content was most recently updated

**Article Footer** – Often contains database and publisher information

**Database name:** Contemporary Authors

**Database publisher:** Gale

The footer shows that the source was published originally by the database. You can look for the citation of the article to give you an idea if the source was originally published elsewhere and then hosted by the database, or published by the database itself

**Date Accessed:** Only include if the source is one that might change.

**Citation:** J.D. Salinger. (2010, February 25). Retrieved April 26, 2010, from http://www.gale.cengage.com
